

LeTeEm Newsletter 1 (Autumn 2014)

Introduction to LeTeEm

LeTeEm encourages young European students to develop employability through creative thinking, curiosity and enquiry, critical thinking, social and communications skills, confidence and practicality.

It is a very practical project that will answer the need for students and employers to narrow the gap between the worlds of education and work, by utilising a knowledge partnership between, research (Universities), employers and schools.

What the project will produce

The resources are multi-level and designed for use by all three areas of the knowledge partnership:

- To develop pedagogical guides for trainers and teachers as well as learners
- To bring together teachers and learners and employers to exchange experiences
- To run training courses for teacher trainers/teachers on how to implement the methodology
- To organise a large scale pilot across Europe in secondary schools
- To evaluate the results of the pilot project
- To produce best practice guides
- To produce use case scenarios for teachers/stakeholders

The partnership

Coordinator

University of the West of Scotland (UWS), Paisley, Scotland, UK

Partners

Laurea University of Applied Sciences (Laurea), Finland

Sofia University, Bulgaria

European Business & Innovation Centre Network (EBN), Belgium

Inspectoratul Scolar Judetean Prahova (ISJP), Romania

Getting involved

The project is now looking for schools across Europe that would like to get involved and help to pilot the project. Teachers will be given training on the projects online training course. Just write us at the email below:

Best wishes

Prof. Thomas Connolly (Coordinator)
